Big Shot, Cardstock, Designer Series Paper

FYI

Originals dies have sharp edges—handle with care.

When cutting intricate, detailed images, paper (or other material) may become caught in the die. Remove carefully to prevent ripping.

Not all materials will work well with some designs. Experiment a bit with your dies and materials to make sure you get the cutting results you want.

Adhesives, Cardstock, Designer Series Paper

FYI

Smooth punches by punching through waxed paper.

Punches are not meant to cut multiple sheets of paper at once. Cut only one sheet of paper at a time.

These punches are not designed to hold in your hand. You'll get best results if you place the punch on a table and press straight down, applying pressure firmly and evenly. If you try to hold it in your hand and squeeze it to punch, it will be very hard to press, and it might pinch your hand.

To extend the life of the punch lock, squeeze the punch together tightly before sliding the lock.

Scissors, Fringe

Features & Benefits

- Decorative scissors
- Cut fringe, grass, confetti in seconds

Upsell Opportunity

Cardstock

FYI

We do not recommend cutting Glimmer Paper with Fringe Scissors.

To get the cleanest cut, cut with the middle of the blades. Don't start from the screw, and stop cutting before you get to the blade tips. If you cut with either end of the blades, the paper will tear slightly instead of cut cleanly.
