

Mod Podge® Dishwasher Safe - Glass Plate

(These instructions are specifically for Dishwasher Safe Mod Podge)

STEP #1

Clean the project surface. This removes any dirt and oils for better adhesion. Use a mild soap to wash glass plate with warm soapy water – rinse thoroughly, and let dry. If cleaning a large surface, use a cotton ball and rubbing alcohol to clean surface. Use an adhesive remover (ie. Goo Gone) to remove residue from price sticker, if needed.

STEP #2

Roll Mod Podge bottle on table, or between hands, to mix it. Do not shake. Once mixed, use a soft bristle brush to apply a thin layer of Mod Podge to the bottom of the plate.

STEP #3

While the Mod Podge is still wet, place the fabric with the decorative design facing down, over the plate and carefully smooth into place.

STEP #4

Turn the plate right side up and use scissors to trim excess fabric. Leaving approximately 1/2" around the plate.

(These instructions are specifically for Dishwasher Safe Mod Podge)

STEP #5

Apply a thin layer of Mod Podge over the fabric. Let dry for 1- 2 hours and then apply 2 more coats.

STEP #6

After each Mod Podge application and while wet, be sure to clean brushes in warm soapy water. This will keep the brush from becoming hard and unusable.

STEP #7

Once dry, turn plate right side up and use scissors to trim the remaining fabric around the plate's edge.

STEP #8

If the fabric is not completely adhered to the edges, apply a bit more Mod Podge and press the fabric onto the plate to seal the edges. Once the edges are adhered, apply another layer of Mod Podge to the plate and let dry. Apply 2 more coats. Repeat Step #6 and let plate dry 1 – 2 hours between each application.

(These instructions are specifically for Dishwasher Safe Mod Podge)

STEP #9

Let the Mod Podge cure on the plate for 28 days. After 28 days, wash by hand or in the top rack of the dishwasher.

Mod Podge® Dishwasher Safe Gloss

Mod Podge® Dishwasher Safe is a decoupage formula that can be applied to glass, ceramic, and metal. This specific formula allows the item to be cleaned in the dishwasher. Once cured, the item will be top-rack dishwasher safe with regular detergent on a regular cycle.

Glass Plate, 10 in.

Brandy purchased her 10" glass plates at Dollar Tree for \$1.25 each.

Supplies Needed

- Mod Podge® Dishwasher Safe Gloss
- Fabric
- Glass Plate
- Mild Soap
- Soft Bristle Brush
- Scissors
- Optional: Rubbing Alcohol, Goo Gone, Rubber Gloves

BrandysCards
PAPER CRAFTING

1. Is ALL Mod Podge® dishwasher safe?

No, all Mod Podge formulas are NOT dishwasher safe. This is the only formula top-rack dishwasher-safe for ceramics, glass and metal.

2. Is Mod Podge® Dishwasher Safe also microwave safe?

Negative. You should NOT microwave anything you make with this formula.

3. My project feels dry. Is it Cured?

Cure time is different than dry time. “Dry” means dry to the touch. Curing is a chemical strengthening process. It's when the formula has reached it's peak chemical performance.

4. How many days do I have to wait to put it in the dishwasher?

For BEST results wait 28 days!! After air curing, the decoupage project is top-shelf dishwasher safe with regular detergent on regular wash cycle. When washing in the dishwasher, the decoupage layer will absorb a little water and create a milky look. The project will be a little tender at this point, so be careful when handling. Do not be alarmed; it will fully dry to its original state.

PAPER CRAFTING

5. I waited 28 days and washed my project. It's ruined!

This might happen if not enough layers of Mod Podge have been applied or they may have been too light. It is also possible the surface was not cleansed well before beginning. Regular oils from hands and other things (ie. dirt, lint) can cause the formula not to adhere properly.

6. Can I put food on my Mod Podge® Dishwasher Safe?

While it is water based and non-toxic (so it won't hurt you), it is not FDA approved food-safe. So, please don't put the Mod Podge on the top of the plate.

PAPER CRAFTING

7. Where can I purchase Mod Podge® Dishwasher Safe?

All formulas are available on the manufacturer's website, Plaidonline.com. Amazon or craft stores offer a variety of formulas and sizes. This formula comes in 8, 16, or 32 ounce bottle.
